Round table: introductory thoughts

Davide Viaggi

Department of Agricultural and Food
Sciences

Why an ecosystem services perspective

Long term productivity

Caring for multiple resources (land, water)

Environmental public goods

Connection with local development

Exp. in less rich/more fragile ecosystems (e.g. Mediterranean)

Focus on:

- Balanced ecosystem management (investment in natural capital)
- Waste re-use
- Economic and social balance
- Consistency with other valorisation strategies (GI, organic, tourism)

Bioeconomy & CAP....

Consistent with RDP approaches (especially the proposed new delivery model of the CAP->regional trade-offs and objectives

No just more money....

- rather push for **innovation**
- caring for consistency with value chains
- understanding new business (models)
- clear indicators
- multi-level distribution of roles
- ...and (consistency of) local legislation
